

How do **Year 8** students ask study questions? Like this:

“Hi i need help with perimeter.”

“Hello, how are you, i just need a little bit of help with a worded problem in pythagoras theorem and trigonometry it might take me some time to write it through.”

“Hi there, I would like some helping thinking of some short story ideas using a stimulus as I am not that good at it. I would like some help on planning out my narrative structure. I will be writing a short story. Please help!”

You get 24/7 study help for free with your library Member number. In fact, more than 1.6 million students in Australia and around the world have access to Studiosity.

You'll get *help not answers*, to give you the confidence to keep going on your own.

Choose to get help from a Subject Specialist or even upload a draft for same-day writing feedback.

First, find Studiosity on the library website.
