

My name is Lachlan Rose and I am a young student who is 16 years of age.

I left school in year 9 to pursue a trade in Metal Fabrication at CIT in Canberra. I am currently doing an apprenticeship which is a certificate 3 and I have found parts of the course work to be quite difficult in some areas and have got some assistance and tutorial assistance from the student support dept in CIT.

Even though I have found the CIT tutoring to be of some help in certain areas I have also found the tutoring that I have received from Studiosity to be also helpful in a lot of areas. It has been really good to be able to work through maths problems with your tutors from home and at times where I cannot access tutoring from CIT.

I will continue to use studiosity through summer when I am revising my maths work for Fabrication and next year when I am back to study.

So, thanks again to all the tutors who have helped me this year and I wish you all a merry xmas happy new year.
