

Teresa Estrella, Master of Clinical Nursing student,  
University of Tasmania

Utilising Studiosity was a great help with my written assessments. The staff at Studiosity are brilliant and very knowledgeable. They not only helped me to improved my grammar, but also helped with referencing and improving the structure of my essay. They are also a great confidence booster and life saver. After failing my first assessment this year, I lost my confidence to do my second assessment and did not want to continue further. My unit coordinator has referred me to the Studiosity team which has given me an opportunity to learn more about writing skills. I wish I could have utilised their assistance earlier.

Academic writing is complex and can be challenging to many students. As a student from a non-English speaking background, written communication can be very difficult when it comes to grammar, vocabulary, sentence structure and expressing ideas. The Studiosity team is an amazing group of people that are able to help students improve their writing skills, and are a source of great support to build the students' confidence, enabling them to be able to write more effectively.

Thank you to the Studiosity team for all you do. Your time and patience in correcting our work are very much appreciated. Your help is very important to us specially to the students who are struggling with their written assessments. It will also be very helpful for first year students to have an easy transition to university studies and ultimately enjoy their university life and experience. Well done and keep up the great work.

Sincerely,

Teresa
